

10th IDKD Intensive Course in Greece
Excellence in Teaching

Diseases of the Brain, Head and Neck, Spine

September 29 – October 1, 2017
Athens, Greece

An Interactive Course in Diagnostic Imaging
Main Program

General Concept and Course Objectives

Concept

The International Diagnostic Course Davos (IDKD) offers interactive teaching workshops, presented by a highly qualified international faculty. IDKD courses are organ-based with annually changing topics: Brain, Head and Neck, Spine – Chest, Heart and Vascular System – Abdomen and Pelvis – Musculoskeletal. IDKD is currently offering courses in Davos, Switzerland, in Athens, Greece, in Beijing and Hong Kong, China, and Sao Paulo, Brazil.

For the 10th time, IDKD will be run as an Intensive Course in Greece, featuring 14 different workshops spread over 3 days, this time covering Diseases of the Brain, Head and Neck, Spine. The course objectives are to review and discuss effective approaches to imaging diagnoses of these organ systems using an interactive format.

Workshops

The participants will attend 14 different workshops. The instruction is in groups of approximately 50 – 60 participants.

During workshops, participants first get a brief introduction to the subject and then study case material prepared by the instructors. Finally, the instructors guide through the cases, discuss different diagnoses, present additional material and ask pertinent questions to the participants, thus allowing active interaction. The teachers can be easily approached during breaks to individually discuss unsolved problems.

The participants are encouraged to bring their own laptop (PC or Mac) for case viewing and will receive the relevant case files on a USB stick. For participants not bringing their own laptop, image

loops will be prepared for viewing the cases on the classroom VCR projector. Participants will stay in the same classroom during all workshops. The case viewing is supported by a special software, uniquely developed for IDKD and drawing from the extensive expertise with electronic teaching.

Highlight Lectures on “Hot Topics” and Diagnostic Dilemmas

Four Highlight lectures presented by experts on “hot topics” and new developments in Diseases of the Brain, Head and Neck, Spine will complete the scientific program.

Practical Workshops

In addition to the teaching program there will be two Practical Workshops offered:

- 1: Hands-on Training upon US of Neck Vessels and Thyroid Gland
- 2: Hands-on Training upon Thyroid Gland and Spine Interventional Radiology Techniques

Course Syllabus

The IDKD Syllabus produced for IDKD Davos 2016 containing the condensed version of the workshops presented is included in digital form in the registration fee and can be found using the login on IDKD homepage.

IDKD Online Cases

IDKD offers access to two well-documented cases per teacher in the IDKD online database. Each participant will be able to access the database with their IDKD user name and password.

IDKD offers interactive, organ-based teaching workshops with annually changing topics.

Scientific Program

Workshops

- 1. Intracranial Haemorrhage**
- 2. Epilepsy**
Walter Kucharczyk, Toronto, ON (CA)
- 3. Dementia**
- 4. White Matter Disease**
Frederik Barkhof, Amsterdam (NL)
- 5. Stroke**
- 6. Sella**
Martin Wiesmann, Aachen (DE)
- 7. Mass Lesions of the Brain: a Differential Diagnostic Approach**
- 8. Evaluating the “Found Down” Patient**
James Smirniotopoulos,
Washington, DC (USA)
- 9. Intracranial Inflammatory Diseases
Other than MS**
- 10. Infection and Inflammation of the Spine
and Spinal Cord**
Pia Maly Sundgren, Lund (SE)
- 11. Spine Degenerative Disease**
- 12. Spinal Tumours**
Lars Stenberg, Lund (SE)
- 13. Extra-mucosal Spaces of the Neck**
- 14. Imaging Evaluation of Head & Neck
Emergencies**
Jenny Hoang, Durham, NC (USA)

Highlight Lectures

- 1. Anatomy and Pathology of the
Central Skull Base**
Spyros Kollias, Zurich (CH)
- 2. Imaging of Sensorineural Hearing Loss**
Spyros Kollias, Zurich (CH)
- 3. Spinal Vascular Diseases: Anatomy,
Classification and Endovascular Treatment**
Michalis Mantazis, Alexandroupolis (GR)
- 4. Endovascular Treatment of Acute
Ischemic Stroke**
George Magoufis, N. Faliro (GR)

Practical Workshops

**Dimitrios Filippiadis
Alexios Kelekis**

1st Day (Saturday) Hands-on Training upon US of Neck Vessels and Thyroid Gland

This session will cover basic and advanced training upon ultrasound examination techniques of neck vessels and thyroid gland, differential diagnosis and training upon elastography methods for carotid arteries plaques and thyroid gland nodules.

2nd Day (Sunday) Hands-on Training upon Thyroid Gland and Spine Interventional Radiology Techniques

Techniques of FNA and percutaneous ablation in thyroid gland will be presented with special focus on devices and their differences. Spine IR techniques including biopsy, augmentation, ablation, disc procedures and pain management will be presented with special focus on devices and their differences. Live demonstration, hands-on workshops with practical tips and tricks.

CME Credits

The 10th IDKD in Greece has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with **21 European CME credits** (ECMEC®s). Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Through an agreement between the European Union of Medical Specialists and the American Medical Association, physicians may convert EACCME® credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME credit to AMA credit can be found at www.ama-assn.org/go/internationalcme.

The Academy for Continuing Medical Education in Radiology designates the 10th IDKD Greece with 21 CME-points, category B.

Program Overview

Friday

September 29, 2017

07.30–08.30	Registration
08.30–08.45	Main Hall Welcome Address Introduction Prof. D. Kelekis, Prof. G. K. von Schulthess
08.45–09.20	Highlight Lecture Anatomy and Pathology of the Central Skull Base Spyros Kollias, Zurich (CH)
09.30–10.45	Workshops
10.45–11.15	Teacher Discussions Coffee Break
11.15–12.30	Workshops
12.30–13.45	Lunch Break
13.45–15.00	Workshops
15.00–15.30	Teacher Discussions Coffee Break
15.30–16.45	Workshops
17.00–18.15	Workshops
18.15–19.15	Welcome Reception

Saturday

September 30, 2017

08.00–09.15	Workshops
09.15–09.45	Teacher Discussions Coffee Break
09.45–11.00	Workshops
11.10–11.45	Highlight Lecture Imaging of Sensorineural Hearing Loss Spyros Kollias, Zurich (CH)
11.45–12.45	Lunch Break
12.45–13.45	Practical Workshop 1 Dimitrios Filippiadis, Alexios Kelekis, Athens (GR)
13.45–15.00	Workshops
15.00–15.30	Teacher Discussions Coffee Break
15.30–16.45	Workshops
17.00–18.15	Workshops

Sunday

General Information

Registration

Registrations are accepted online at www.idkd.org.

Registration Fees (in EURO)

Registration fees include the full teaching program, access to the IDKD syllabus via homepage, coffee breaks, Welcome Reception and lunch buffets.

	Regular	Residents
Early (until August 30):	€ 590.–	€ 380.–
Standard:	€ 690.–	€ 480.–

Important: All residents must show proof of their resident status within 10 days of registering online by e-mail to greece@idkd.org.

Για τους Έλληνες συμμετέχοντες που εργάζονται στην Ελλάδα, μπορούν να ισχύσουν ειδικά δίδακτρα. Για να αποκτήσετε αυτές τις ειδικές τιμές, παρακαλούμε συμπληρώστε τη φόρμα που θα βρείτε κατά την εγγραφή σας, με την οποία μπορείτε να επικοινωνήσετε με το γραφείο μας το οποίο είναι υπεύθυνο για αυτό.

Payments preferable by bank transfer

Bank:	UBS AG, CH-8098 Zurich
Account No:	251-964156.64T (EUR)
Clearing:	251
BIC/Swift:	UBSWCHZH80A
IBAN:	CH54 0025 1251 9641 5664 T
Reference:	IDKD Davos / Greece
Credit Card:	VISA or Eurocard/Mastercard

Cancellation Policy

Written notification is required for cancellations and changes. Refunds: 80% until August 30, 2017; 50% until September 15, 2017. No refund thereafter.

Cancellation of the IDKD Course

IDKD is entitled to cancel the Courses at any time. Course fees will be reimbursed in case of cancellation of the IDKD Course due to reasons other than war, war-like events, acts of terrorism or epidemics, in which case only a proportionate part would be refundable.

Confirmation of Registration and Course Badge

Online registrations will be automatically confirmed. You will receive your personal course badge and further information at the Registration Desk onsite. The badge and the USB stick are personal and are your admission card to the course. Once provided **do not lose them!**

In the case of loss, a replacement badge will be provided for an administrative charge of € 30.– and for € 65.– a replacement USB stick.

Disclaimer

The IDKD and the Course Management cannot accept liability for acts of any suppliers to this meeting nor the safety of any attendee while in transit to or from this event nor for any accidents or injuries that may occur. All participants are strongly advised to carry sufficient travel and health insurance.

Applicable Law and Jurisdiction

Swiss law is applicable. The courts of Zurich, Switzerland, shall have exclusive jurisdiction.

Duration

14 workshops (max. 5 workshops/day) and 4 lectures spread over 3 days, Friday, September 29, 08.45 (Registration starting at 07.30) and ending on Sunday, October 1, 16.35.

Opening Hours Course Office

Friday, September 29, 2017 07.30 – 18.30.
All other days: 30 min. before until 30 min. after sessions.

Program Changes

Information and times mentioned in this document may be subject to change.

Updated information will be published on www.idkd.org

Coffee and Lunch Breaks

Coffee and soft drinks will be offered and served during intermissions. Three Lunch buffets are included in the registration fee.

For individual lunches, there are two restaurants close by.

IDKD on the Internet

Information is regularly updated. Please visit our website at www.idkd.org

Venue – Accommodation – Travel

Venue – Accommodation

Hotel Divani Apollon
10 Ag. Nikolaou & Iliou Str.
166 71 Athens (Vouliagmeni)
Phone: +30 (0)210 891 11 00
Web: www.divanis.com

The IDKD course is held at the Hotel Divani Apollon at a distance of 18 km from the Athens airport El. Venizelos and Athens Centre. It offers the ultimate standard of conference facilities. It is recommended to participants who wish to stay at the congress site.

An additional 4* city smart hotel is located right opposite to the venue: the Amarilia Hotel (www.amarilia.gr).

Please make your hotel reservation online through the reservation form on www.idkd.org, IDKD Greece Accommodation.

Travel

There are direct regular or charter flights to Athens. A taxi drive from Athens airport to the hotels takes 30 min. The hotel offers regular daily bus connections to the centre of Athens.

For travel arrangements, transfers or sight-seeing tours in mainland Greece or the Greek islands, please contact our local tour operator Theotokis Travel.

Social Program

Welcome Reception

The official Welcome Reception will be held on Friday, September 29, 18.15 – 19.15 in the garden of the Hotel Divani Apollon, immediately following the last workshop.

All participants and guests are cordially invited.

IDKD Greek Evening

An informal IDKD Greek evening will take place on Saturday, September 30, starting with drinks at 19.00 at the “Mythos of the Sea” restaurant. Local culinary delights will be served on the open air deck to the sound of Greek music. Specially prepared local products will be freshly grilled and accompanied by local wines. It will be a delightful evening. Places are restricted.

Price: € 60.00 (dinner incl. drinks)

Acknowledgements

The IDKD is grateful to all companies who helped through their collaboration and contribution to realize and develop the 10th IDKD Course in Greece.

DOTAREM[®]

Gadoteric acid

NO COMPROMISE in THE DOTAREM WORLD

Excellent Safety & Optimal Diagnostic Performance

DOTAREM 0.5 mmol/mL solution for injection. **Composition:** For 100 mL of solution: active ingredient: Gadoteric Acid 27.932 g corresponding to: DOTA 20.246 g corresponding to gadolinium oxide 9.062 g. **Indications (*):** Medicinal product for diagnostic use only: Magnetic Resonance Imaging for cerebral and spinal disease, diseases of the vertebral column, and other whole-body pathologies (including angiography). **Posology and method of administration:** The recommended dose is 0.1 mmol/kg, i.e. 0.2 mL/kg in adults and children. In angiography, depending on the results of the examination being performed, a second injection may be administered during the same session if necessary. Angiography with Gadoteric acid is not recommended in children (0-18 years). In Encephalic and spinal MRI, in some exceptional cases, as in the confirmation of isolated metastasis or the detection of leptomeningeal tumours, a second injection of 0.2 mmol/kg may improve tumor characterization and facilitate therapeutic decision making. For patients with impaired renal function and paediatric population (0-18 years) more than one dose should not be used during a scan, injections should not be repeated unless the interval between injections is at least 7 days. The product must be administered by strict intravenous injection. Depending on the amount of gadoteric acid to be given to the child, it is preferable to use gadoteric acid vials with a single use syringe of a volume adapted to this amount in order to have a better precision of the injected volume. In neonates and infants the required dose should be administered by hand. **Contraindications:** Hypersensitivity to gadoteric acid, to meglumine or to any medicinal products containing gadolinium. **Special warnings and precautions for use:** Dotarem must not be administered by subarachnoid (or epidural) injection. The usual precaution measures for MRI examination should be taken such as exclusion of patients with pacemakers, ferromagnetic vascular clips, infusion pumps, nerve stimulators, cochlear implants or suspected intracorporeal metallic foreign bodies, particularly in the eye. **General particularities corresponding to all gadolinium contrast agents:** All gadolinium based contrast media can cause minor or major hypersensitivity reactions that can be life-threatening. These can occur immediately (within 60 minutes) or be delayed (within 7 days) and are often unpredictable. Because of the risk of major reactions, emergency resuscitation equipment should be available for immediate use. Hypersensitivity reactions can be aggravated in patients on beta-blockers and particularly in the presence of bronchial asthma. These patients may be refractory to standard treatment of hypersensitivity reactions with beta agonists. Impaired renal function: Prior to administration of gadoteric acid, it is recommended that all patients are screened for renal dysfunction by obtaining laboratory tests. There have been reports of Nephrogenic Systemic Fibrosis (NSF) associated with use of some gadolinium-containing contrast agents in patients with severe renal impairment (GFR < 30 mL/min/1.73 m²). As there is a possibility that NSF may occur with Dotarem, it should only be used in these patients after careful consideration. **CNS disorders:** As with other contrast agents containing gadolinium, special precautions should be taken in patients with a low seizure threshold. Precautionary measures, e.g. dose monitoring, should be taken. All equipment and drugs necessary to counter any convulsions which may occur must be made ready for use beforehand. **Interactions with other medicinal products and other forms of interaction:** No

interactions with other medicinal products have been observed. Formal drug interaction studies have not been carried out. **Fertility, pregnancy and lactation:** Gadoteric acid should not be used during pregnancy unless the clinical condition of the woman requires use of gadoteric acid. Continuing or discontinuing breast feeding for a period of 24 hours after administration of gadoteric acid, should be at the discretion of the doctor and lactating mother. **Effects on ability to drive and use machines:** No studies on the effects on the ability to drive and use machines have been performed. Ambulant patients while driving vehicles or operating machinery should take into account that nausea may incidentally occur. **Undesirable effects:** Uncommon (≥1/1000 to <1/100): hypersensitivity, headache, dyspnea, dizziness, somnolence, paraesthesia (including burning sensation), hypotension, hypertension, nausea, abdominal pain, rash, feeling hot, feeling cold, asthenia, injection site reactions (extravasation, pain, discomfort, oedema, inflammation, coldness). Rare (≥1/10 000 to <1/1 000): anxiety, presyncope, eyelid edema, palpitations, sneezing, throat tightness, vomiting, diarrhea, salivary hypersecretion, Urticaria, pruritus, hyperhidrosis, chest pain, chills. Very rare (<1/10 000): anaphylactic reaction, anaphylactoid reaction, agitation, coma, convulsion, syncope, tremor, parosmia, conjunctivitis, ocular hyperaemia, vision blurred, lacrimation increased, tachycardia, cardiac arrest, arrhythmia, bradycardia, flushing, pallor, vasodilatation, hot flush, cough, dyspnoea, nasal congestion, respiratory arrest, bronchospasm, throat irritation, laryngospasm, pharyngeal oedema, dry throat, pulmonary oedema, erythema, angioedema, eczema, muscle cramps, muscular weakness, back pain, arthralgia, malaise, chest discomfort, pyrexia, face oedema, injection site necrosis (in case of extravasation), phlebitis superficial, decreased oxygen saturation. **Not known:** nephrogenic systemic fibrosis. **Overdose:** Gadoteric acid can be removed by haemodialysis. However there is no evidence that haemodialysis is suitable for prevention of nephrogenic systemic fibrosis. **Please note:** The peel-off tracking label on the vials or syringes should be stuck onto the patient record to enable accurate recording of the gadolinium contrast agent used. The dose used should also be recorded. If electronic patient records are used, the name of the product, the batch number and the dose should be entered into the patient record. **Pharmacological properties:** Pharmacotherapeutic group: paramagnetic contrast media for MRI, ATC code: V08CA02. **Presentation (*):** 5, 10, 15, 20, 60 & 100 mL in vial (glass) and 10, 15 & 20 mL in a pre-filled syringe (glass). **Marketing authorization holder: (*)** Information: Guerbet - BP 57400 - F-95943 Roissy (c) cedex - FRANCE. Tel: 33 (0) 1 45 91 50 00. Date of revision of this document: September 2016.

For current and complete prescribing information refer to the package insert and/or contact your local Guerbet organization. (*) Indications, presentations and marketing authorization holder may differ from country to country. Reporting of suspected adverse reactions is important as it helps to continuously assess the benefit-risk balance. Therefore, Guerbet encourages you to report any adverse reactions to your health authorities or to our local Guerbet representative.

DOB Health Paris - P17 043 DDT - February 2017 - Photo: Olivier Dillinger
